This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Capsule summary

- Frontal fibrosing alopecia is an increasingly frequent scarring alopecia with unclear prognosis.
- We developed and validated a Frontal Fibrosing Alopecia Severity Score to assess the severity of the disease.
- The Frontal Fibrosing Alopecia Severity Score can be used for clinical practice and research purposes.
