Ciclosporin Use in Epidermal Necrolysis Is Associated with an Important Mortality Reduction: Evidence from Three Different Approaches

C. González-Herrada, S. Rodríguez-Martín, L. Cachafeiro, V. Lerma, O. González, J.A. Lorente, A. Rodríguez-Miguel, J. González-Ramos, G. Roustán, E. Ramírez, T. Bellón, F.J. de Abajo

PII: S0022-202X(17)31645-7

DOI: [10.1016/j.jid.2017.05.022](https://doi.org/10.1016/j.jid.2017.05.022)

Reference: JID 903

To appear in: *The Journal of Investigative Dermatology*

Received Date: 31 January 2017

Revised Date: 27 April 2017

Accepted Date: 22 May 2017

Please cite this article as: González-Herrada C, Rodríguez-Martín S, Cachafeiro L, Lerma V, González O, Lorente J, Rodríguez-Miguel A, González-Ramos J, Roustán G, Ramírez E, Bellón T, de Abajo F, on behalf of the PIELenRed Therapeutic Management Working Group, Ciclosporin Use in Epidermal Necrolysis Is Associated with an Important Mortality Reduction: Evidence from Three Different Approaches, *The Journal of Investigative Dermatology* (2017), doi: 10.1016/j.jid.2017.05.022.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
