This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Comparison of the Loop Technique with Incision and Drainage for Soft Tissue Abscesses: A Systematic Review and Meta-Analysis

Running Head: Loop Drainage Technique versus Incision and Drainage for Abscesses

Authors and Affiliations:

Michael Gottlieb, MD, RDMS

Department of Emergency Medicine, Rush University Medical Center, Chicago, IL

Gary D. Peksa, PharmD

Department of Emergency Medicine, University Rush Medical Center, Chicago, IL

Key Words: loop drainage; minimally invasive; abscess; incision and drainage; I&D; soft tissue infection

Acknowledgements: The authors would like to thank Tania Rivero, MLIS for her assistance with the literature search.

Disclosures/Funding: This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors. We have no disclosures to declare.

Meetings: None

IRB: N/A
