Anti-dsDNA antibodies and resident renal cells — Their putative roles in pathogenesis of renal lesions in lupus nephritis

Susan Yung, Tak Mao Chan

PII: S1521-6616(16)30361-8
DOI: doi: [10.1016/j.clim.2016.09.002](https://doi.org/10.1016/j.clim.2016.09.002)
Reference: YCLIM 7729

To appear in: *Clinical Immunology*

Received date: 11 June 2016
Revised date: 1 September 2016
Accepted date: 4 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Anti-dsDNA Antibodies and Resident Renal Cells - Their Putative
Roles in Pathogenesis of Renal Lesions in Lupus Nephritis**

Susan Yung and Tak Mao Chan

Department of Medicine, University of Hong Kong, Queen Mary Hospital, Hong Kong

Running Title: Anti-dsDNA antibodies, inflammation and fibrosis in lupus nephritis
