This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Toll-like receptor activation in the pathogenesis of lupus nephritis

Georg Lorenz, M.D.¹, Maciej Lech, Ph.D.², Hans-Joachim Anders, M.D.²

1. Abteilung für Nephrologie, Klinikum rechts der Isar, Technische Universität München, Ismaninger Str. 22, 81675, Munich, Germany
2. Nephrologisches Zentrum, Medizinische Klinik und Poliklinik IV, Klinikum der Ludwig Maximilians Universität München, Munich, Germany

Word count of abstract: 107

Word count of article: 9568

Running title: TLRs in lupus nephritis

Financial disclosure and conflict of interest statements: none

Financial support: H.-J.A. is supported by the European Union's Horizon 2020 research and innovation program under grant agreement No. 668036 (RELENT). The views expressed here are the responsibility of the author(s) only. The EU Commission takes no responsibility for any use made of the information set out. G.L. is supported by the Else Kröner-Forschungskolleg for clinician scientists. M.L. is supported by the Deutsche Forschungsgemeinschaft (LE2621/3-1).
