This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dietary intakes of fat soluble vitamins as predictors for mortality from heart failure in a large prospective cohort study

Running head: Fat soluble vitamins and heart failure death.

Ehab S. Eshak^{1,2*}, Ph.D; Hiroyasu Iso¹, Ph.D; Kazumasa Yamagishi³, Ph.D; Renzhe Cui¹, Ph.D; Akiko Tamakoshi⁴, Ph.D.
