This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Outcomes of Endoscopic Balloon Dilation vs Surgical Resection for Primary Ileocolic Strictures in Patients with Crohn's Disease

Authors: Nan Lan, Luca Stocchi, Jean H Ashburn, Tracy L Hull, Scott R Steele, Conor P Delaney, Bo Shen

From: Department of Colorectal Surgery and Center for Inflammatory Bowel Disease, Digestive Disease and Surgery Institute, the Cleveland Clinic, Cleveland, Ohio, 44195.

Running Title: Balloon Dilation vs. Surgery for Primary Crohn's Disease Stricture

Meeting Presentation: This study was presented as a poster at the digestive disease week May 2017, Chicago, IL.

Correspondence: Luca Stocchi, MD
Desk A30, Department of Colorectal Surgery
