Short Title: Cutpoints for Treated Eosinophilic Esophagitis

Grant Support: This research was supported, in part, by NIH awards T32DK007634 (CCR, WAW, CCC), K24DK100548 (NJS), K23DK090073 (ESD), and P30DK034987

Abbreviations: Area under the curve (AUC), esophagogastroduodenoscopy (EGD), eosinophilic esophagitis (EoE), eosinophils per high-power field (eos/hpf), EoE endoscopic reference score system (EREFS), endoscopic severity score (ESS), EoE symptom activity index (EEsAI), high-power field (hpf), receiver operator curve (ROC), topical corticosteroid (tCS), visual analogue scale (VAS)

Disclosures: Dr. Dellon has received research funding from Meritage, Miraca, Nutricia, Receptos/Celgene, Regeneron, and Shire, an educational grant from Banner, and is a consultant for Adare, Alvio, Banner, Enumeral, GSK, Receptos/Celgene, Regeneron, and Shire. None of the other authors have any relevant conflicts of interest to disclose.

Writing assistance No writing assistance was used for this paper

Word count: 2932

Specific author contributions (all authors approved the final version):

Reed: Manuscript drafting; data analysis/interpretation; critical revision

Wolf: Manuscript drafting; data analysis/interpretation; critical revision

Cotton: Data extraction; critical revision

Rusin: Pathology reading; critical revision

Perjar: Pathology reading; critical revision

Hollefield: Pathology reading; critical revision

Woosley: Pathology supervision; critical revision

Shaheen: Data interpretation; critical revision

Dellon: Project conception; supervision; data analysis/interpretation; manuscript drafting; critical revision.
