This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript Number: CGH 17-01084

Title: Volatile Organic Compounds in Feces Associate With Response to Dietary Intervention in Patients With Irritable Bowel Syndrome

Megan Rossi*^{1,2},

Study concept and design; analysis and interpretation of data; drafting of the manuscript; critical revision of the manuscript for important intellectual content; statistical analysis; administrative and material support.

No conflict of interest to declare.

Raphael Aggio*³,

Study concept and design; acquisition of data; analysis and interpretation of data; drafting of the manuscript; critical revision of the manuscript for important intellectual content; statistical analysis and technical support

No conflict of interest to declare.

Heidi M. Staudacher^{1,2},

Study concept and design; acquisition of data; critical revision of the manuscript for important intellectual content; statistical analysis; obtained funding

No conflict of interest to declare.

Miranda C. Lomer^{1,2},

Study concept and design; critical revision of the manuscript for important intellectual content; material and technical support; study supervision

MCL is the co-inventor of a mobile application for the low FODMAP diet

James O Lindsay⁴,

Study concept and design; critical revision of the manuscript for important intellectual content; material and technical support; study supervision.

No conflict of interest to declare.
