This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Word count: 6481

Competing Financial Interests: The authors declare no conflict of interest

Grant Support: This study was supported by grants from the Swedish Research Council (VR project nrs 2013-03862 and 2017-02403), the Health Department of the Basque Government (grant 2015111133), and the Spanish Ministry of Economy and Competitiveness (ISCIII grant FIS PI17/00308) to MDA, and NIH grants 1P50 DK64539, R01 DK048351, P30 DK 41301 to EAM and LC. The research leading to these results has received funding from the EU FP7 under grant nr 313010 (BBMRI-LPC). MGN was supported by an ERC Consolidator Grant (#310372) and a Spinoza Grant of the Netherlands Organization for Scientific Research.

Author Contributions: MDA and AZ study concept and design; LB, FBr, LA, AA, AD, GL, PTS, PK, BO, MS, SW, GN, RC, PUS, FG, MN, PP, MB, GBa, AL, VT, MGN, DJ, LC, EAM, MMW, GBo, MC patients characterization, data acquisition; FBo, TZ, KGE, FH statistical analyses; FBo, TZ, MDA, MH, AF, data analysis and interpretation; MDA obtained funding, administrative and technical support, and study supervision; FBo and MDA drafted the manuscript, with input and critical revision from all other authors. All authors approved the final draft of the manuscript.
