This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Krüppel-like Factor 5, Increased in Pancreatic Ductal Adenocarcinoma, Promotes Proliferation, Acinar to Ductal Metaplasia, Pancreatic Intraepithelial Neoplasia, and Tumor Growth in Mice

Short Title: KLF5 and Pancreatic Tumorigenesis

Authors: Ping He¹, Jong Won Yang¹, Vincent W. Yang^{1,2}, Agnieszka B. Bialkowska^{1,*}

¹Department of Medicine, Stony Brook University School of Medicine, Stony Brook, NY;

²Department of Physiology and Biophysics, Stony Brook University School of Medicine, Stony Brook, NY

Grant Support: This study was supported by grants from the National Institute of Health (DK052230, DK093680, CA084197 and CA172113 to V.W.Y. and F30CA206240 to P.H.) and Pilot Project Grant from Stony Brook University awarded to A.B.B.

Abbreviations: KRAS (Kirsten rat sarcoma viral oncogene homolog); PDAC (pancreatic ductal adenocarcinoma); PanIN (pancreatic intraepithelial neoplasia); ADM (acinar-to-ductal metaplasia); KLF5 (Krüppel-like factor 5); MEK (mitogen-activated protein kinase kinase); PI3K (phosphatidylinositol 4,5-bisphosphate 3-kinase)

Disclosures: The authors have declared that no conflict of interest exists.

Transcript Profiling: GSE104055

Writing Assistance: N/A

Author Contributions: P.H. designed and performed the experiments, analyzed data, and wrote the manuscript. J.W.Y. performed H&E and IHC stainings and animal breeding and selection. A.B.B. designed and performed the experiments. A.B.B. and V.W.Y. conceived and supervised the study, and provided conceptual advice regarding the study and critical edits on the manuscript.
