

# Accepted Manuscript

DNA Methylation and Transcription Patterns in Intestinal Epithelial Cells From Pediatric Patients With Inflammatory Bowel Diseases Differentiate Disease Subtypes and Associate With Outcome

K.J. Howell, J. Kraiczy, K.M. Nayak, M. Gasparetto, A. Ross, C. Lee, T.N. Mak, B.-K. Koo, N. Kumar, T. Lawley, A. Sinha, P. Rosenstiel, R. Heuschkel, O. Stegle, M. Zilbauer

PII: S0016-5085(17)36241-8  
DOI: [10.1053/j.gastro.2017.10.007](https://doi.org/10.1053/j.gastro.2017.10.007)  
Reference: YGAST 61474

To appear in: *Gastroenterology*  
Accepted Date: 2 October 2017

Please cite this article as: Howell KJ, Kraiczy J, Nayak KM, Gasparetto M, Ross A, Lee C, Mak TN, Koo B-K, Kumar N, Lawley T, Sinha A, Rosenstiel P, Heuschkel R, Stegle O, Zilbauer M, DNA Methylation and Transcription Patterns in Intestinal Epithelial Cells From Pediatric Patients With Inflammatory Bowel Diseases Differentiate Disease Subtypes and Associate With Outcome, *Gastroenterology* (2017), doi: 10.1053/j.gastro.2017.10.007.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Title: DNA Methylation and Transcription Patterns in Intestinal**  
2 **Epithelial Cells From Pediatric Patients With Inflammatory Bowel**  
3 **Diseases Differentiate Disease Subtypes and Associate With**  
4 **Outcome**

5 Short title: Intestinal epithelial Multi-omics in IBD

23 \* Indicates equal contribution

24

25 **Grant Support:** This work was supported by funding from the following organisations:  
26 Crohn's in Childhood Research Association (CICRA), the Evelyn Trust, Crohn's and Colitis in  
27 Childhood ("3Cs"), Addenbrookes Charitable Trust (ACT) and Crohn's and Colitis UK (CCUK;  
28 M16-5). K.H. was funded by an EBPOD EMBL-EBI/Cambridge Biomedical Research Centre  
29 Postdoctoral Fellowship. P. R. was supported by the Deutsche Forschungsgemeinschaft  
30 EXC306, BMBF DEEP IHEC TP5.2, EMED SysINFLAME CP4 and EU SYSCID DLV-733100.
