This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Interactions Between Platelets and Inflammatory Monocytes Affect Sickness Behavior in Mice  
With Liver Inflammation

Authors

Charlotte D'Mello<sup>1</sup>, Wagdi Almishri<sup>1</sup>, Hongqun Liu<sup>2</sup>, Mark Gordon Swain<sup>1</sup>

**Acknowledgments**

This work was supported by an operating grant and Team Grant (Chronic Inflammation Initiative) awarded by the Canadian Institutes of Health Research (MGS as PI), and by the Cal Wenzel Family Foundation Chair in Hepatology (held by MGS). This work was also supported by the Live Cell Imaging Facility funded by an equipment and infrastructure grant from Canadian Foundation Innovation and Alberta Science and Research Authority. M.G.S. is a Professor of Medicine and holds the Cal Wenzel Family Foundation Chair in Hepatology.

We would like to acknowledge the following individuals: Drs. Pina Colarusso and Kasia Stevens, University of Calgary Live Cell Imaging Facility, for microscope training and technical advice related to imaging. Laurie Kennedy and Yiping Liu, University of Calgary Flow Cytometry Core Facility, for assistance with flow cytometry
