EUS-Guided Hepaticoenterostomy as a portal to allow definitive antegrade treatment of benign biliary diseases in patients with surgically altered anatomy

Theodore W. James, MD, Y. Claire Fan, MD, Todd H. Baron, MD

PII: S0016-5107(18)32664-6

DOI: [10.1016/j.gie.2018.04.2353](https://doi.org/10.1016/j.gie.2018.04.2353)

Reference: YMGE 11069

To appear in: *Gastrointestinal Endoscopy*

Received Date: 15 March 2018

Accepted Date: 24 April 2018

Please cite this article as: James TW, Fan YC, Baron TH, EUS-Guided Hepaticoenterostomy as a portal to allow definitive antegrade treatment of benign biliary diseases in patients with surgically altered anatomy, *Gastrointestinal Endoscopy* (2018), doi: 10.1016/j.gie.2018.04.2353.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

EUS-Guided Hepaticoenterostomy as a portal to allow definitive antegrade treatment of benign biliary diseases in patients with surgically altered anatomy

Accepted for presentation at the 2018 ASGE Annual Scientific Meeting during DDW

Theodore W. James, MD¹, Y. Claire Fan, MD² and Todd H. Baron MD¹

¹Division of Gastroenterology and Hepatology, University of North Carolina, Chapel Hill

²Department of Medicine, University of North Carolina, Chapel Hill

Key Words: Endoscopic ultrasound; biliary stricture; Roux-en-Y; choledocholithiasis; hepaticojejunostomy; hepaticogastrostomy; ERCP; ERC; Endoscopic Retrograde Cholangiography

Conflicts of interest: Dr. Baron is a consultant and speaker for Boston Scientific, W.L. Gore, Cook Endoscopy and Olympus America

Funding declaration: Dr. James receives research and training support in part by a grant from the NIH (T32DK007634).

Contributions: Dr. James collected data, analysed data, authored key portions of the manuscript and edited key portions of the manuscript. Dr. Fan collected and analysed data. Dr. Baron authored key portions of the manuscript, edited key portions of the manuscript and selected key images for figure creation.
