Short running title: Risk of Missed Neoplasia Based on BBPS Scores

Key words: bowel preparation; missed neoplasia; colonoscopy

Disclosures: D. Lieberman was the executive director of the Clinical Outcomes Research Initiative (CORI), a nonprofit organization supporting this study. This potential conflict of interest has been reviewed and managed by the Oregon Health & Science University and Veterans Affairs Conflict of Interest in Research Committee. D. Lieberman and CORI are supported with funding from National Institute of Health grants NIDDK U01 DK057132, R33-DK61778-01, and R21-CA131626. Funding from NIDDK supports the collection, management, analysis, and interpretation of this and all CORI research. In addition, the practice network (CORI) has received support for the infrastructure of the practice-based network from AstraZeneca, Bard International, Pentax USA, ProVation, Endosoft, GIVEN Imaging, and Ethicon. The commercial entities had no involvement in this research. No other financial relationships relevant to this publication were disclosed.

Funding: NIH K08 DK090150-05 (AHC)

Abbreviations: BBPS, Boston Bowel Preparation Scale; C1, colonoscopy #1; C2, colonoscopy #2; CORI, Clinical Outcomes Research Initiative; CRC, colorectal cancer, USMSTF, US Multi-Society Task Force

Word count: 3537

Presented in part at Digestive Disease Week in Washington, D.C. in May 2015.

Author contributions: Matthew Kluge interpreted data and drafted the manuscript. Connie Wu collected and interpreted the data and revised the manuscript. J Luke Williams collected and interpreted the data and revised the manuscript. Brian Jacobson planned the study, interpreted data and revised the manuscript. Paul Schroy planned the study, interpreted data and revised the manuscript. David Lieberman planned the study, collected and interpreted the data and revised the manuscript. Audrey Calderwood obtained funding, planned the study, collected the data, analyzed and interpreted the data, performed the statistical analysis, and drafted and revised the manuscript. All authors approved the final version of the manuscript.
