This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Dissection-enabled scaffold-assisted resection (DeSCAR): a novel technique for resection of residual or non-lifting GI neoplasia of the colon (with video)

Authors: Matthew W Stier M.D., Christopher G. Chapman M.D., Allie Kreitman, John A. Hart M.D., Shu-Yuan Xiao M.D., Uzma D Siddiqui M.D., Irving Waxman M.D.

Affiliation: University of Chicago Center for Endoscopic Research and Therapeutics (CERT)

Institution: The University of Chicago

Running Title: Dissection-enabled Scaffold Assisted Resection (DeSCAR) for GI Neoplasia

IRB#: 11-0721, approved 4/24/12 and last renewal date 6/26/17

Meeting Presentations: DDW 2017
