This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of microRNA expression in the thymus of Myasthenia Gravis patients opens new research avenues

Abbreviations:	AChR:	acetylcholine receptor
	DGCR8:	DiGeorge syndrome Critical Region gene 8
	FC:	fold change
	FMR1:	fragile X mental retardation 1
	IFN-I/ β :	type-I interferon/interferon β
	IFNAR:	interferon alpha and beta receptor subunit
	MG :	myasthenia gravis
	miRNA:	micro-RNA
	TEC:	thymic epithelial cell
	WDR1:	WD repeat domain 1

Keywords: miRnome, miR-7, miR-125, CCL21, FMR1, WDR1
