

## Accepted Manuscript

Title: Characterization of a hybrid protein designed with segments of allergens from *Blomia tropicalis* and *Dermatophagoides pteronyssinus*

Authors: Dalgys Martínez, Jose Fernando Cantillo, Helber Herazo, Judith Wortmann, Walter Keller, Luis Caraballo, Leonardo Puerta L

PII: S0165-2478(18)30012-9  
DOI: <https://doi.org/10.1016/j.imlet.2018.01.012>  
Reference: IMLET 6168

To appear in: *Immunology Letters*

Received date: 16-1-2018  
Revised date: 23-1-2018  
Accepted date: 29-1-2018

Please cite this article as: Martínez Dalgys, Cantillo Jose Fernando, Herazo Helber, Wortmann Judith, Keller Walter, Caraballo Luis, Puerta L Leonardo. Characterization of a hybrid protein designed with segments of allergens from *Blomia tropicalis* and *Dermatophagoides pteronyssinus*. *Immunology Letters* <https://doi.org/10.1016/j.imlet.2018.01.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Characterization of a hybrid protein designed with segments of allergens  
from *Blomia tropicalis* and *Dermatophagoides pteronyssinus***

### Highlights

- ► We generated a novel genetically engineered molecule that combines IgE epitopes contained in several allergens from the house dust mite *D. pteronyssinus* and *B. tropicalis*
