Title: HCV deep-sequencing for sub-genotypes identification of mixed infections: a real life experience

Authors: José A del Campo, Manuel Parra-Sánchez, Blanca Figueruela, Silvia García-Rey, Josep Quer, Josep Gregori, Samuel Bernal, Lourdes Grande, José C Palomares, Manuel Romero-Gómez

PII: S1201-9712(17)30328-4
DOI: <https://doi.org/10.1016/j.ijid.2017.12.016>
Reference: IJID 3124

To appear in: *International Journal of Infectious Diseases*

Received date: 15-9-2017
Revised date: 5-12-2017
Accepted date: 7-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HCV deep-sequencing for sub-genotypes identification of mixed infections: a real life experience.

Running Title: Deep-sequencing is relevant for HCV mixed infections
