

## Accepted Manuscript

Title: A near full-length open reading frame next generation sequencing assay for genotyping and identification of resistance-associated variants in hepatitis C virus

Authors: M.S. Pedersen, U. Fahnøe, T.A. Hansen, A.G. Pedersen, H. Jenssen, J. Bukh, K. Schønning

PII: S1386-6532(18)30147-1  
DOI: <https://doi.org/10.1016/j.jcv.2018.05.012>  
Reference: JCV 4008

To appear in: *Journal of Clinical Virology*

Received date: 23-12-2017  
Revised date: 22-5-2018  
Accepted date: 26-5-2018

A near full-length open reading frame next generation sequencing assay for genotyping and identification of resistance-associated variants in hepatitis C virus. *Journal of Clinical Virology* (2018), <https://doi.org/10.1016/j.jcv.2018.05.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A near full-length open reading frame next generation sequencing assay for genotyping and identification of resistance-associated variants in hepatitis C virus.**
