

## Accepted Manuscript

Title: Interferon lambda receptor 1 (IFNL1R) transcript is highly expressed in rhinovirus bronchiolitis and correlates with disease severity

Authors: Alessandra Pierangeli, Maura Statzu, Raffaella Nenna, Letizia Santinelli, Laura Petrarca, Antonella Frassanito, Massimo Gentile, Guido Antonelli, Fabio Midulla, Carolina Scagnolari

PII: S1386-6532(18)30066-0  
DOI: <https://doi.org/10.1016/j.jcv.2018.03.003>  
Reference: JCV 3968

To appear in: *Journal of Clinical Virology*

Received date: 20-11-2017  
Revised date: 23-2-2018  
Accepted date: 9-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Interferon lambda receptor 1 (IFNL1R) transcript is highly expressed in rhinovirus bronchiolitis and correlates with disease severity

Running title: Interferon lambda receptor 1 and respiratory viruses
