

Accepted Manuscript

Non-linear optical microscopy as a novel quantitative and label-free imaging modality to improve the assessment of tissue-engineered cartilage

Ashrafal Islam, Elisabeth Inge Romijn, Magnus Borstad Lilledahl, Inigo Martinez-Zubiaurre

PII: S1063-4584(17)31057-9

DOI: [10.1016/j.joca.2017.06.008](https://doi.org/10.1016/j.joca.2017.06.008)

Reference: YJOCA 4036

To appear in: *Osteoarthritis and Cartilage*

Received Date: 15 November 2016

Revised Date: 22 May 2017

Accepted Date: 20 June 2017

Please cite this article as: RRH: SHG and scoring of engineered cartilage.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Non-linear optical microscopy as a novel quantitative and label-free imaging modality to improve the assessment of tissue-engineered cartilage
