Title: *Blastocystis* Subtypes Detected in Long-tailed Macaques in Thailand—Further Evidence of Cryptic Host Specificity

Authors: Kotchaphon Vaisusuk, Weerachai Saijuntha, Sutthira Sedlak, Thongchit Thanchomnang, Warayutt Pilap, Warong Suksavate, Christen Rune Stensvold, Chairat Tantrawatpan

PII: S0001-706X(17)30738-6
DOI: <http://dx.doi.org/10.1016/j.actatropica.2017.09.002>
Reference: ACTROP 4430

To appear in: *Acta Tropica*

Received date: 22-6-2017
Revised date: 1-9-2017
Accepted date: 4-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Blastocystis* Subtypes Detected in Long-tailed Macaques in Thailand—Further Evidence of Cryptic Host Specificity**

Running title: *Blastocystis* subtypes in Long-tailed Macaques

Highlights

- Overlapping *Blastocystis* subtype distribution between humans and NHPs is confirmed
- More evidence of cryptic host specificity is presented
- ST2 strains might be shared between humans and non-human primates
