Title: Molecular characterization and epidemiology of extended spectrum beta-lactamase producing *Klebsiella pneumoniae* isolates from immunocompromised patients in Tunisia

Authors: Farah BEN TANFOUS, Wafa ACHOUR, Anis RADDAOUI, Assia BEN HASSEN

PII: S2213-7165(17)30244-8
DOI: <https://doi.org/10.1016/j.jgar.2017.12.014>
Reference: JGAR 565

To appear in:

Received date: 26-10-2017
Revised date: 19-12-2017
Accepted date: 27-12-2017

Please cite this article as: Farah BEN TANFOUS, Wafa ACHOUR, Anis RADDAOUI, Assia BEN HASSEN, Molecular characterization and epidemiology of extended spectrum beta-lactamase producing *Klebsiella pneumoniae* isolates from immunocompromised patients in Tunisia (2010), <https://doi.org/10.1016/j.jgar.2017.12.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BEN TANFOUS

**Molecular characterization and epidemiology of extended spectrum beta-lactamase
producing *Klebsiella pneumoniae* isolates from immunocompromised patients in Tunisia**

All authors meet the ICMJE authorship criteria

Highlights

- Limited dissemination of the specific CTX-M-15 *K. pneumoniae* clones ST15 and ST101 among immunocompromised patients.
