Granulocyte Macrophage Colony-Stimulating Factor Alone Reduces *Toxoplasma gondii* Replication in Microglial Culture by Superoxide and Nitric Oxide, without IFN- $\gamma$  production: A Preliminary Report

Tamirys Simão Pimenta, Natalie Ferreira Chaves, Ana Paula Drummond Rodrigues, Cristovam Wanderley Picanço Diniz, Renato Augusto DaMatta, José Antônio Picanço Diniz Junior

PII: S1286-4579(18)30123-0

DOI: [10.1016/j.micinf.2018.05.006](https://doi.org/10.1016/j.micinf.2018.05.006)

Reference: MICINF 4590

To appear in: *Microbes and Infection*

Received Date: 2 March 2018

Revised Date: 3 May 2018

Accepted Date: 30 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
