

Accepted Manuscript

Title: Herpes Simplex Virus Virucidal Activity of MST-312 and Epigallocatechin Gallate

Authors: Prajakta Pradhan, Marie L. Nguyen

PII: S0168-1702(17)30537-3
DOI: <https://doi.org/10.1016/j.virusres.2018.03.015>
Reference: VIRUS 97367

To appear in: *Virus Research*

Received date: 4-10-2017
Revised date: 21-12-2017
Accepted date: 26-3-2018

Please cite this article as: Pradhan P, Nguyen ML, Herpes Simplex Virus Virucidal Activity of MST-312 and Epigallocatechin Gallate, *Virus Research* (2018), <https://doi.org/10.1016/j.virusres.2018.03.015>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Herpes Simplex Virus Virucidal Activity of MST-312 and Epigallocatechin Gallate

Prajakta Pradhan and Marie L. Nguyen*

Department of Microbiology and Immunology, Des Moines University, 3200 Grand Avenue, Des Moines, IA 50312

* **Corresponding Author** Marie.Nguyen@dmu.edu

Highlights

- 40 – 100 μ M MST-312 treatment reduced the plaque forming ability of HSV virions
- 0.5 – 20 μ M EGCG treatment reduced the plaque forming ability of HSV virions
- Virucidal activities were most effective at room temperature and 37° C
