

Accepted Manuscript

Title: Quantitative characterization of hepatitis delta virus genome edition by next-generation sequencing

Authors: Sara Sopena, Cristina Godoy, David Tabernero, Maria Homs, Josep Gregori, Mar Riveiro-Barciela, Alicia Ruiz, Rafael Esteban, Maria Buti, Francisco Rodríguez-Frías

PII: S0168-1702(17)30386-6
DOI: <https://doi.org/10.1016/j.virusres.2017.10.003>
Reference: VIRUS 97257

To appear in: *Virus Research*

Received date: 19-5-2017
Revised date: 2-10-2017
Accepted date: 2-10-2017

Please cite this article as: Sopena, Sara, Godoy, Cristina, Tabernero, David, Homs, Maria, Gregori, Josep, Riveiro-Barciela, Mar, Ruiz, Alicia, Esteban, Rafael, Buti, Maria, Rodríguez-Frías, Francisco, Quantitative characterization of hepatitis delta virus genome edition by next-generation sequencing. *Virus Research* <https://doi.org/10.1016/j.virusres.2017.10.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Name of journal: *Virus Research*

Manuscript type: Research article

Quantitative characterization of hepatitis delta virus genome edition by next-generation sequencing
