This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Infection-Induced Thrombin Production: A Potential Novel Mechanism for Preterm Premature Rupture of Membranes (PPROM)

Authors: Liping Feng^{1,3}, Terrence K. Allen², William P. Marinello¹, Amy P. Murtha¹

1. Department of Obstetrics and Gynecology, Duke University, Durham, North Carolina

2. Department of Anesthesiology, Duke University, Durham, North Carolina

3. Ministry of Education-Shanghai Key Laboratory of Children's Environmental Health, Xinhua Hospital, Shanghai Jiao Tong University School of Medicine, Shanghai, China

Disclosure: The authors report no conflict of interests.

Sources of Funding: This study was supported by the Charles Hammond Fund of the Department of Obstetrics and Gynecology, Duke University (PI: Liping Feng) and the National Center for Advancing Translational Sciences of the National Institutes of Health under Award Number KL2TR001115 (Terrence K. Allen). The funders had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.

Previous Presentation: This research was presented in part at the 63rd Annual Meeting of the Society for Reproductive Investigation, 16-19 March 2016, Montreal, Canada.

Corresponding author: Liping Feng, MD; Department of Obstetrics and Gynecology, Division of Maternal Fetal Medicine, Box 103208, Duke University Medical Center, Durham, NC 27710.
