This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Dose and duration of opioid use in propensity score matched, privately insured opioid users with and without spinal cord injury

Running Head: OPIOID USE AND SPINAL CORD INJURY

Authors:

Brittany N. Hand, PhD, MOT, OTR/L¹

James S. Krause, PhD¹

Kit N. Simpson, DrPH¹

¹College of Health Professions, Medical University of South Carolina

Support: This work was supported by the South Carolina Spinal Cord Injury Research Fund, grant numbers #2016 PD-01. This study was partially supported by the South Carolina Clinical & Translational Research (SCTR) Institute, with an academic home at the Medical University of South Carolina, through NIH - NCATS Grant Number UL1 TR001450. Data analytic support for the study was provided through support for the CEDAR core funded by the MUSC Office of the Provost.

We certify that no party having a direct interest in the results of the research supporting this article has or will confer a benefit on me or on any organization with which we are associated AND, if applicable, we certify that all financial and material support for this research (eg, NIH or NHS grants) and work are clearly identified in the title page of the manuscript.

The manuscript submitted does not contain information about medical device(s).
