This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: Caring for the arm post-stroke

What is the longitudinal profile of impairments and can we predict difficulty caring for the profoundly-affected arm in the first year post-stroke?

Rhoda Allison Clin Doc Res, Torbay & South Devon NHS Trust

Cherry Kilbride PhD, Brunel University London, UK

Jade Chynoweth BSc (Hons), Plymouth University, UK

Siobhan Creanor BSc (Hons), Plymouth University, UK

Ian Frampton PhD, University of Exeter, UK

Jonathon Marsden PhD, Plymouth University, UK

Presentations

World Congress of Neurological Rehabilitation, Philadelphia, May 2016.

Financial support

This study was funded by a grant from Torbay Medical Research Fund (TOR 106).

Conflicts of interest: Rhoda Allison has received education grants and consultancy fees from Allergan UK. Cherry Kilbride has received lecture fees from Allergan UK.

Correspondence: Rhoda Allison, Newton Abbot Hospital, Devon, TQ12 2SL, UK
