This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: Physical Activity, Orthopaedic Injury

Title: Physical Activity and Sedentary Behaviour Subsequent to Serious Orthopaedic Injury:
A Systematic Review

Christina L. Ekegren PhD¹, Ben Beck PhD¹, Rachel E.D. Climie PhD², Neville Owen PhD³,
David W. Dunstan PhD², Belinda J. Gabbe PhD^{1,4}

¹ Department of Epidemiology and Preventive Medicine, Monash University, Melbourne, Australia

² Physical Activity Laboratory, Baker Heart and Diabetes Institute, Australian Catholic University, Melbourne, Australia

³ Behavioural Epidemiology Laboratory, Baker Heart and Diabetes Institute, Swinburne University of Technology, Melbourne, Australia

⁴ Farr Institute, Swansea University Medical School, Swansea University, Swansea, United Kingdom

Financial support:

Dr Christina Ekegren is supported by a National Health and Medical Research Council (NHMRC) Early Career Fellowship (1106633). Dr Ben Beck received salary support from the National Health and Medical Research Council (NHRMC) Australian Resuscitation Outcomes Consortium (Aus-ROC) Centre of Research Excellence (1029983). Professor Neville Owen is supported by an NHMRC Senior Principal Research Fellowship (1003960) and a Victorian Government Operational Infrastructure Support Program. Professor David Dunstan is supported by an NHMRC Senior Research Fellowship (1078360). Professors Owen and Dunstan are also supported by an NHMRC Centre of Research Excellence Grant
