This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

36 adult female rats were divided into six groups

	control group (n=6, feed normal diet)
	CdCl ₂ - treated group (n=6, 50 mg CdCl ₂ /kg diet)
	CC-treated group (n=6, 150 mg CC / kg diet)
	CC+ CdCl ₂ group (n=6)
	FVE (n=6, 150 mg / kg diet)
	FVE + CdCl ₂ (n=6).

8 weeks later, all rats scarified (6 estrus cycles)

In Cadmium chloride treatment

liver, kidney and gonadal functions were significantly impaired

Treatment with aqueous seed extracts of FVE

protect Liver, kidney and gonadal functions against cadmium intoxication

Treatment Aqueous seed extracts of CC

defend against cadmium and protect Liver and kidney functions
