This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# IS REMOVAL OF THE PRESSURE REGULATING BALLOON NECESSARY AFTER ARTIFICIAL URINARY SPHINCTER CUFF EROSION?

Alexander T Rozanski, Boyd R Viers, Nabeel A Shakir, Travis J Pagliara, Jeremy M Scott, and Allen F Morey

Department of Urology  
UT Southwestern Medical Center

Abstract: 250

Text: 2216

Figures: 2

Tables: 2

Key words: artificial urinary sphincter, erosion, pressure regulating balloon, infection

Running title: Is PRB removal necessary after AUS erosion?

## Correspondence:

Allen F. Morey, MD

Department of Urology

UT Southwestern Medical Center

5323 Harry Hines Blvd.

Dallas, TX 75390-9110

Email: [Allen.Morey@UTSouthwestern.edu](mailto:Allen.Morey@UTSouthwestern.edu)

Disclosures: Dr. Allen F. Morey receives honoraria for being a guest lecturer/meeting participant for Boston Scientific and Coloplast Corp. The other authors declare that they have no relevant financial interests.

## **Abstract**

### Objectives:

To characterize the risk of delayed infectious complications from retained pressure regulating balloons (PRB) after artificial urinary sphincter (AUS) cuff erosion.
