Short Title: Urine Toxicology Screening on Labor and Delivery

Financial support: Use of the REDCap service for this project was supported by NIH/NCRR Colorado CTSI Grant Number UL1 RR025780. Its contents are the authors' sole responsibility and do not necessarily represent official NIH views.

Presented at ACOG Annual Clinical and Scientific Meeting, San Diego, CA, May 5-9, 2017. Poster ID's: 3Q and 15N

Keywords: Toxicology screening; drug use in pregnancy; illicit drug use; substance abuse

Condensation: On Labor and Delivery, positive urine toxicology tests are most strongly associated with maternal historical factors, especially known drug use, and not clinical risk factors.
