18 Laparoscopic surgery should be considered as a valuable treatment option for
19 intractable chylous ascites and peanut oil used before surgery could facilitate the
20 detection of the leakage during surgery.

24 **Abstract**

25 A 23-year-old female patient with refractory chylous ascites was successfully
26 treated with laparoscopic ligation of the ruptured lymphatic vessel. The young patient
27 developed abdominal distention after right side pelvic lymph node dissection for
28 dysgerminoma of the right ovary. Conservative managements failed to control the
29 symptoms. Laparoscopic surgery was carried out after oral administration of peanut
30 oil, revealing the presence of a whitish fluid in the abdominal cavity. The responsible
