Potential enhancement of articular cartilage histological grading with collagen integrity

Hayley R. Moody, Isaac O. Afara, Sanjleena Singh, Adekunle Oloyede

PII: S0268-0033(18)30367-X
DOI: doi:[10.1016/j.clinbiomech.2018.04.016](https://doi.org/10.1016/j.clinbiomech.2018.04.016)
Reference: JCLB 4526
To appear in: *Clinical Biomechanics*
Received date: 14 May 2017
Accepted date: 25 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Potential enhancement of articular cartilage histological grading with collagen integrity

Hayley R. Moody, Ph.D. ^{1,2}	h.moody@qut.edu.au
Isaac O. Afara, Ph.D. ^{1,3}	isaac.afara@uef.fi

³ Department of Applied Physics, University of Eastern Finland, Kuopio, Finland.

Research highlights

- Damaged cartilage matrix disruption is related to collagen fibril reorganization.
- Imaging reveals changes in collagen architecture during cartilage degeneration.
- Collagen integrity information can improve cartilage grading and evaluation.
