

## Accepted Manuscript

Design and clinical outcome of a novel 3D-printed prosthetic joint replacement for the human temporomandibular joint

David Ackland, Dale Robinson, Peter Vee Sin Lee, George Dimitroulis

PII: S0268-0033(18)30392-9  
DOI: doi:[10.1016/j.clinbiomech.2018.05.006](https://doi.org/10.1016/j.clinbiomech.2018.05.006)  
Reference: JCLB 4533  
To appear in: *Clinical Biomechanics*  
Received date: 19 July 2017  
Accepted date: 8 May 2018

Please cite this article as: David Ackland, Dale Robinson, Peter Vee Sin Lee, George Dimitroulis , Design and clinical outcome of a novel 3D-printed prosthetic joint replacement for the human temporomandibular joint. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Jclb(2017), doi:[10.1016/j.clinbiomech.2018.05.006](https://doi.org/10.1016/j.clinbiomech.2018.05.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**DESIGN AND CLINICAL OUTCOME OF A NOVEL 3D-PRINTED PROSTHETIC  
JOINT REPLACEMENT FOR THE HUMAN TEMPOROMANDIBULAR JOINT**

David Ackland<sup>1</sup>, Dale Robinson<sup>1</sup>, Peter Vee Sin Lee<sup>1</sup>, George Dimitroulis<sup>2</sup>

<sup>1</sup>Department of Biomedical Engineering, University of Melbourne, Australia

<sup>2</sup>Department of Surgery, St Vincent's Hospital, Victoria, Australia

Submitted to *Clinical Biomechanics*

Abstract word count: 250 words

Manuscript word count (Introduction through Discussion): 4,416 words

Address for correspondence:

David C. Ackland
