Title: Gender and Limb Differences in Temporal Gait Parameters and Gait Variability in Ankle Osteoarthritis

Authors: C.N. Hughes-Oliver, D Srinivasan, D Schmitt, R.M. Queen

PII: S0966-6362(18)30395-3
DOI: <https://doi.org/10.1016/j.gaitpost.2018.07.180>
Reference: GAIPOS 6454

To appear in: *Gait & Posture*

Received date: 17-4-2018
Revised date: 19-6-2018
Accepted date: 30-7-2018

Please cite this article as: Hughes-Oliver CN, Srinivasan D, Schmitt D, Queen RM, Gender and Limb Differences in Temporal Gait Parameters and Gait Variability in Ankle Osteoarthritis, *Gait and Posture* (2018), <https://doi.org/10.1016/j.gaitpost.2018.07.180>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Gender and Limb Differences in Temporal Gait Parameters and Gait Variability in Ankle Osteoarthritis

Disclaimer: Views expressed in this article are original to the co-authors.

This data was initially collected at Duke University, but all data processing and analysis was completed at Virginia Tech. We would like to acknowledge Leila Kamareddine for processing the data in preparation for this study. The Dean's Diversity Assistantship and the Davenport Fellowship through Virginia Tech funded Cherice Hughes-Oliver during this project. This funding allowed for completion of the study analysis.

Word count: 2952 words

Declaration of interest: none

Highlights

- Mean and variability of stride time and mean stance time are higher in women
- Swing time was higher and stance time was lower on affected limb in both genders
- Limb had a larger effect than gender on temporal gait patterns
- Temporal gait patterns can provide insight into gait dysfunction with ankle OA
