

Accepted Manuscript

Title: Validation of an inertial measurement unit for the quantification of rearfoot kinematics during running

Authors: Daniel Koska, Jasmin Gaudel, Tobias Hein, Christian Maiwald

PII: S0966-6362(18)30700-8
DOI: <https://doi.org/10.1016/j.gaitpost.2018.06.007>
Reference: GAIPOS 6124

To appear in: *Gait & Posture*

Received date: 9-12-2017
Revised date: 3-4-2018
Accepted date: 8-6-2018

Please cite this article as: Koska D, Gaudel J, Hein T, Maiwald C, Validation of an inertial measurement unit for the quantification of rearfoot kinematics during running, *Gait and Posture* (2018), <https://doi.org/10.1016/j.gaitpost.2018.06.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Validation of an inertial measurement unit for the quantification of rearfoot kinematics during running

Tobias Hein: Tobias.Hein@gu.se

Christian Maiwald: christian.maiwald@googlemail.com

Highlights

- Systematic and random measurement error is substantial
- Error distribution is intra-individual and differs between the variables and speeds
- Error appears to be affected considerably by vibration-induced effects
