Total Hip Replacement in patients with Parkinson's disease: improved outcomes with dual mobility implants and cementless fixation

Jean Yves Lazennec, MD, PhD, Youngwoo Kim, MD, PhD, Aidin Eslam Pour, MD

PII: S0883-5403(17)31067-7

DOI: [10.1016/j.arth.2017.11.062](https://doi.org/10.1016/j.arth.2017.11.062)

Reference: YARTH 56269

To appear in: *The Journal of Arthroplasty*

Received Date: 26 October 2017

Revised Date: 25 November 2017

Accepted Date: 27 November 2017

Please cite this article as: Lazennec JY, Kim Y, Pour AE, Total Hip Replacement in patients with Parkinson's disease: improved outcomes with dual mobility implants and cementless fixation, *The Journal of Arthroplasty* (2018), doi: 10.1016/j.arth.2017.11.062.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
