Oxidation, Damage Mechanisms, and Reasons for Revision of Sequentially Annealed HXLPE in Total Knee Arthroplasty

D.W. MacDonald, MS, G.B. Higgs, MS, A.F. Chen, MD, MBA, A. Malkani, M.A. Mont, MD, S.M. Kurtz, PhD

PII: S0883-5403(17)30838-0

DOI: [10.1016/j.arth.2017.09.036](https://doi.org/10.1016/j.arth.2017.09.036)

Reference: YARTH 56112

To appear in: *The Journal of Arthroplasty*

Received Date: 28 March 2017

Revised Date: 7 September 2017

Accepted Date: 18 September 2017

Please cite this article as: MacDonald D, Higgs G, Chen A, Malkani A, Mont M, Kurtz S, Oxidation, Damage Mechanisms, and Reasons for Revision of Sequentially Annealed HXLPE in Total Knee Arthroplasty, *The Journal of Arthroplasty* (2017), doi: 10.1016/j.arth.2017.09.036.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Oxidation, Damage Mechanisms, and Reasons for Revision of Sequentially Annealed HXLPE in Total Knee Arthroplasty

Running Title: Sequentially Annealed HXLPE in TKA

¹MacDonald DW, MS; ¹Higgs GB, MS; ²Chen AF, MD, MBA; ³Malkani A; ⁴Mont MA, MD; ^{1,5}Kurtz SM, PhD

This investigation was performed at the Implant Research Center at Drexel University
