Primary Total Knee Arthroplasty: How Does Residual Patellar Thickness Affect Patient Oriented Outcomes?

Jose C. Alcerro, MD, Mark D. Rossi, PhD, Carlos J. Lavernia, MD

PII: S0883-5403(17)30575-2

DOI: [10.1016/j.arth.2017.06.046](https://doi.org/10.1016/j.arth.2017.06.046)

Reference: YARTH 55972

To appear in: *The Journal of Arthroplasty*

Received Date: 4 January 2017

Revised Date: 14 June 2017

Accepted Date: 26 June 2017

Please cite this article as: Alcerro JC, Rossi MD, Lavernia CJ, Primary Total Knee Arthroplasty: How Does Residual Patellar Thickness Affect Patient Oriented Outcomes?, *The Journal of Arthroplasty* (2017), doi: 10.1016/j.arth.2017.06.046.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Primary Total Knee Arthroplasty:
How Does Residual Patellar Thickness Affect Patient Oriented Outcomes?**

Running Title: Patellar Thickness and Outcomes
