This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Use of Optical Motion Capture for the Analysis of Normative Upper Body Kinematics during Functional Upper Limb Tasks: A Systematic Review

Abbreviated Title:

Use of optical motion capture for analyzing upper body kinematics

Authors:

Aïda M. Valevicius¹, Peter Y. Jun², Jacqueline S. Hebert¹⁻⁴, Albert H. Vette^{1,4,5}

February 17, 2018

Conflict of Interest & Financial Disclosure Statement: None of the authors have any financial or personal relationships with other people or organisations that could inappropriately influence this work.

Key Words: Activities of daily living; Functional tasks; Kinematic outcomes; Optical motion capture; Three-dimensional kinematics; Upper limb function.

Number of figures and tables: **1 Figure and 5 Tables**

Number of words in the text: **6,368 words** (Introduction to Conclusions)

Number of words in the abstract: **197/200 words**
