This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Review title: The Biomechanics of Subsynovial Connective Tissue in Health and its Role in Carpal Tunnel Syndrome.

Short title: SSCT Biomechanics and CTS

Authors: VJMM Schrier¹⁻³, MD; PC Amadio, MD¹

- ¹. Biomechanics Laboratory, division of Orthopedic Research, department of Orthopedic Surgery, Mayo Clinic, Rochester, Minnesota, USA
- ². Department of Plastic and Reconstructive Surgery and Hand Surgery, Erasmus MC, University Medical Center, Rotterdam, the Netherlands
- ³. Department of Rehabilitation Medicine, Erasmus MC

Keywords: Carpal Tunnel Syndrome; Subsynovial Connective Tissue

Author for correspondence:
