Title: Objective measurement of function following lumbar spinal stenosis decompression reveals improved functional capacity with stagnant real-life physical activity

Author: Matthew Smuck, Amir Muaremi, Patricia Zheng, Justin Norden, Aman Sinha, Richard Hu, Christy Tomkins-Lane

PII: S1529-9430(17)30979-8
DOI: <https://doi.org/doi:10.1016/j.spinee.2017.08.262>
Reference: SPINEE 57491

To appear in: *The Spine Journal*

Received date: 1-3-2017
Revised date: 31-7-2017
Accepted date: 28-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Objective Measurement of Function
2 Following Lumbar Spinal Stenosis
3 Decompression Reveals Improved
4 Functional Capacity with Stagnant Real-Life
5 Physical Activity
