Short title: Aluminum Level, Immunization History, and Infant Development

Key words: metals toxicity, aluminum toxicity, aluminum biomarkers, vaccines, immunizations, neurodevelopment

Funding sources: Supported by the Gerber Foundation (to ADW and MPK) and the Agency for Toxic Substances and Disease Registry (ATSDR), cooperative agreement award number 1U61TS000238-01 (to the Region 1 New England Pediatric Environmental Health Specialty Unit). The contents of this manuscript are the responsibility of the authors and do not necessarily represent the official views of the Agency for Toxic Substances and Disease Registry (ATSDR). The U.S. Environmental Protection Agency (EPA) supports the Pediatric Environmental Health Specialty Units (PEHSU) by providing funds to ATSDR under Inter-Agency Agreement number DW-75-92301-05. Neither EPA nor ATSDR endorse the purchase of any commercial products or services mentioned in PEHSU publications.

Disclosure statement: The Gerber Foundation, ATSDR, and EPA did not play any role in the design of this study; the collection, analysis, and interpretation of data; the writing of the report; or the decision to submit the manuscript for publication. The first draft of the manuscript was written by Dr. Karwowski; no honorarium, grant, or other form of payment was given to anyone to produce the manuscript. The authors have no potential, perceived, or real conflicts of interest to disclose. All authors approved the final manuscript as submitted and agree to be accountable for all aspects of the work.
