

Reviewer Acknowledgment

Reviewers for Academic Pediatrics deserve our highest praise. They freely give their time and provide quality and constructive feedback to authors whose scholarship is improved by their colleagues' contributions. Authors appreciate this advice, and even when manuscripts have to be rejected, often thank the journal for the advice of the reviewers. We include here the list of all reviewers whose reviews were completed in 2017. We sincerely thank every one of you, and we apologize to anyone whose name was accidentally omitted from this list.
