This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Multi-Institution Analysis of Predictors of Timing of Inguinal Hernia Repair among Premature Infants

Brian C Gulack, MD, MHS^{1,3}; Rachel Greenberg, MD, MHS^{2,3}; Reese H Clark, MD⁴; Marie Lynn Miranda, PhD^{2,5}; Martin L Blakely, MD, MS⁶; Henry E Rice, MD^{1,2}; Obinna O Adibe, MD, MHS^{1,2}; Elisabeth T Tracy, MD¹; P Brian Smith, MD, MPH, MHS^{2,3}

Departments of Surgery¹ and Pediatrics², Duke University Medical Center, Durham, NC; Duke Clinical Research Institute³, Durham, NC; Pediatrix Medical Group,⁴ Inc., Sunrise FL; Department of Statistics⁵, Rice University, Houston TX; Department of Pediatric Surgery⁶, Vanderbilt University Medical Center, Nashville, TN.

Source of Funding: Dr. Smith receives salary support for research from the NIH and the National Center for Advancing Translational Sciences of the NIH (HHSN267200700051C, HHSN275201000003I, and UL1TR001117); he also receives research support from industry for neonatal and pediatric drug development (www.dcri.duke.edu/research/coi.jsp). Dr. Blakely receives support from the NIH (U01HD076733 and R01HD086792). Dr. Greenberg receives support from the NIH (5T32HD043029-1, HHSN 275201000003I, and HHSN272201300017I).

The funding bodies played no role in the study design; collection, analysis, and interpretation of data; the writing of the manuscript; or the decision to submit the manuscript for publication. Dr. Gulack wrote the first draft of the manuscript and received no honorarium for his effort.

Level of Evidence: IV
