This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Median and dorsal raphe serotonergic neurons control moderate versus compulsive cocaine intake

Short title:

Raphe nucleus specific regulation of cocaine intake

Michel M.M. Verheij^{1,2,*}, Candice Contet^{2,*}, Peter Karel¹, Judith Latour¹, Rick H.A. van der Doelen³, Bram Geenen³, Josephus A. van Hulten⁴, Francisca Meyer⁴, Tamas Kozicz³, Olivier George², George F. Koob^{5,#} and Judith R. Homberg^{1,#}
