Neurogenetic Approaches to Stress and Fear in Humans as Pathophysiological Mechanisms for Posttraumatic Stress Disorder

Frauke Nees, Stephanie H. Witt, Herta Flor

PII: S0006-3223(18)30026-X

DOI: [10.1016/j.biopsych.2017.12.015](https://doi.org/10.1016/j.biopsych.2017.12.015)

Reference: BPS 13430

To appear in: *Biological Psychiatry*

Received Date: 13 April 2017

Revised Date: 19 December 2017

Accepted Date: 22 December 2017

Please cite this article as: Nees F., Witt S.H. & Flor H., Neurogenetic Approaches to Stress and Fear in Humans as Pathophysiological Mechanisms for Posttraumatic Stress Disorder, *Biological Psychiatry* (2018), doi: 10.1016/j.biopsych.2017.12.015.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Neurogenetic Approaches to Stress and Fear in Humans as
Pathophysiological Mechanisms for Posttraumatic Stress Disorder**
